

# ALL ABOUT FINX

---

**Q:** What is **FINX**?

**A:** FINX is a Dutch-designed fabric protector that creates a shield against dirt as well as water-based and oil-based stains. In addition, bacteria and odours can't permeate the fabric. The protective coating is also flame-retardant; this actively reduces the flammability of treated items, and prevents fire or delays its spread.

The FINX logo, consisting of the word 'FINX' in a white, bold, sans-serif font, set against a solid orange rectangular background.
